

Ownership Structure in Cyberpreneurship

- ▶ Ownership structure refers to the legal form and arrangement through which a cyber-based enterprise is created, financed, controlled, and managed.
- ▶ It determines:
 - ▶ Who owns the business
 - ▶ How decisions are made
 - ▶ How profits and risks are shared
 - ▶ Legal rights and obligations
 - ▶ Compliance requirements (taxation, registration, liability, etc.)

Sole Proprietorship

- ▶ Owned by one person.
- ▶ Examples: Small Instagram clothing shops, YouTubers, freelance web designers.
- ▶ Easy to start but the owner takes all risks.

Partnership

- ▶ Owned by two or more people.
- ▶ Examples: Friends running a mobile app startup together or a small digital marketing agency.
- ▶ More ideas and money, but partners may disagree.

Private Limited Company (Ltd)

- ▶ The company is separate from the owners.
- ▶ Examples: Flutterwave, Paystack, Andela, Opay.
- ▶ Investors can support the business, and the owners' personal risk is limited.

Public Limited Company (PLC)

- ▶ A Public Limited Company (PLC) is a big business where anyone can buy shares and become part-owner.
- ▶ Examples: MTN Nigeria, Amazon.
- ▶ They raise huge funds but must follow strict rules (Must report financial performance to the public)

Platform/Franchise Ownership

- ▶ A Platform or Franchise model is when you run your own business but use someone else's brand, system, or technology to operate it.
- ▶ Examples: Uber/Bolt drivers, Konga and Jumia sellers, Amazon FBA sellers.
- ▶ They get support but must follow platform rules.

Cooperative or Community-Based Digital Ownership

- ▶ A cooperative (or community-owned business) is a business that is owned and run by its members or users, not by a single person or private investors.
- ▶ Example: Wikipedia (supported by volunteers and donors).
- ▶ Fair system but decisions are slower.
